Syllabus

U.S. Economic History

Overview

ECON 1740-003, Su’12, 3 Credits, Fulfills AI Requirement

This class uses an economic framework to address the historical development of the United States from its colonial beginnings to the present. The economy is a system that harnesses human effort and other resources to provide material things for people and it shapes the social environment in which we live. As such, we not only will learn the important facts and institutions relating to US Economic History, but also the methods with which we may gain further insight. This course helps students better appreciate economic forces for historical change and to understand the economic consequences of historical events in the modern U.S. economic system.

Course Objectives

By the end of the semester, a student who is successful in this course will have gained an understanding of

1. sources of economic growth in the US, including natural resource endowments, innovation and technological change, institutional change, and intra- and international trade (including innovations in communication and transportation)

2. effects of economic growth for the US population as a whole and for sub-populations, including the evolution of living standards, changes in the nature of work, and the increasing role of markets in peoples lives

3. measurement of important economic concepts and variables, including gross domestic product, income, wealth, unemployment, and inflation

4. evolution of US government policy as it relates to the economy, including the
growth of the public sector over time, the regulation of the labor market (including the operation and abolition of slavery and the regulation of immigration), and the use of fiscal and monetary policy to mitigate the harmful effects of economic downturns

5. application of historical insights to contemporary policy debates
6. functioning of the modern U.S. economic system from an analysis of its past
